Q4 - What are or have been your basic symptoms?

Fatigue, dizziness, pain, memory fog

Post-exertional malaise, joint pain, fatigue,

Unexpected tiredness, becoming more tired than

Chronic fatigue, pain, nausea, dizziness, cognitive

- Brain fog

Fatigue, pain, weakness, severe headache (also for

Hypermobility, joint pain, subluxation/complete

Joint dislocation, joint pain, fainting and fatigue

Chronic fatigue – ongoing tiredness even after rest.

Fatigue, Tachycardia, Fainting, Chronic joint pain

Chronic fatigue, chronic pain, unrefreshing sleep,

Fatigue, dizziness, PEM, black outs, sleep

Fatigue, brain fog, post-exertional malaise,

Tiredness not eased by sleep, 'pain-somnia', need

slow motor function, shakes (without loss of

ADHD, fibromyalgia, Dysautonomia: POTS (Postural

Fatigue, palpitations, dizziness and fainting, post-

tiredness, breathing difficulties, chronic pain

pain, spontaneous dislocations, racing heart,

Q5 - In what manner did these symptoms present? eg. Which symptoms presented first? Have any symptoms
Pain and fatigue

Began with a severe recurring infection, which is under control with medication but I still have fatigue. If I do not
The joint and muscle pain came first (since childhood) and presents as an extreme tightness in the calf muscles.
First pain and fatigue and dizziness, then nausea, increasingly cognitive fog.

Disassociation symptoms have been affecting me for as long as I can remember, worsened around late 2021,
In 1990, had glandular fever, then never fully recovered. Very fatigued. Got every virus going and for worse and
I have been hypermobile for my whole life, but in the past 10 years especially the symptoms have worsened in
I suffered with chronic joint pain and dislocations first, then the fatigue and fainting became more of a problem
My symptoms began gradually after Covid, with fatigue appearing first, then shortness of breath, followed by
Joint pain was the first to show in my childhood, although this was dismissed as "growing pains". They did not go
Back pain initially that never seemed to resolve that slowly

Fatigue, brain fog and some other symptoms came first. Early symptoms directly attributable to covid-19 such as
Fatigue, PEM and poor unrefreshing sleep presented first. Other symptoms developed ~7 years ago

'Pain-somnia' is generally a lot less prevalent than it used to be, and I have become better at pacing (mostly!)
shakes started, all symptoms have progressed and gotten worse

2012: in a period of stress: I had migraine with visual aura that lasted for 1-2 months straight. After several years
Fatigue, SOB, palpitations, dizziness, GI problems and joint pain were present since I was a child as long as I
chronic pain and no

Most are lifelong symptoms as this is a genetic condition. Many are fleeting, erratic or consistently present but at
