

Folk Methods Interview MPhil

Codes

Name	Description	Files	References
Condition Onset	Descriptions of when and how a participant experienced onset of their chronic fatigue symptoms.	19	24
Conditions	Conditions described by participants.	2	2
CFS	Instances of participants describing themselves as having CFS.	7	7
Congenital Condition	Instances of participants describing themselves as having a congenital condition.	1	1
EDS	Instances of participants describing themselves as having EDS of any type.	9	10
Fibromyalgia	Instances of participants describing themselves as having Fibromyalgia.	3	3
FND	Instances of participants describing themselves as having FND.	2	2
Hypermobility	Instances of participants describing themselves as having JHS.	11	13
Hypernoea	Instances of participants describing themselves as having Hypernoea. Only 1 instance is recorded and information on the condition is not available. It is still included due to the participant description.	1	1

Name	Description	Files	References
IBS	Instances of participants describing themselves as having IBS.	1	1
Long Covid	Instances of participants describing themselves as having Long Covid.	2	2
ME	Instances of participants describing themselves as having ME.	1	2
MS	Instances of participants describing themselves as having MS.	1	2
PEM	Instances of participants describing themselves as having PEM.	4	4
POTS-Tachycardia	Instances of participants describing themselves as having POTS or any type of Tachycardia.	8	10
Sjogren's Syndrome	Instances of participants describing themselves as having Sjogren's Syndrome.	1	1
Sleep Apnea	Instances of participants describing themselves as having Sleep Apnea.	0	0
Small Fibre Neuropathy	Instances of participants describing themselves as having Small Fibre Neuropathy.	1	1
Device Use or Misuse	Descriptions of tracker usage methods by participants.	0	0
Device Misuse	Descriptions of the usage of trackers by participants in contrast to their designed intent.	0	0
Negative Misuse	Descriptions of the usage of trackers by participants in contrast to their designed intent that had negative results for the participant.	1	2

Name	Description	Files	References
Positive Misuse	Descriptions of the usage of trackers by participants in contrast to their designed intent that had positive results for the participant.	13	50
Device Use	Descriptions of the usage of trackers by participants within their intended and designed scope.	0	0
Negative Use	Descriptions of the usage of trackers by participants within their intended and designed scope that had negative results for the participant.	4	5
Positive Use	Descriptions of the usage of trackers by participants within their intended and designed scope that had positive results for the participant.	6	16
Devices and Apps	Any reference to a tracker or a trackers features made by a participant.	0	0
Design Negative	Negative feedback regarding some aspect of a tracker as described by a participant.	1	1
Affordability	Negative feedback from a participant describing the cost of trackers, whether initial purchase or some other cost such as subscriptions or replacement parts.	4	6
Device Durability	Negative feedback from a participant describing the physical durability of a tracker.	0	0
Energy Levels	Negative feedback from a participant describing features of a tracker that record, calculate or present user energy levels at any point of use.	3	8

Name	Description	Files	References
Fitness Focus	Negative feedback from a participant describing a tracker as having a focus on increasing the fitness of the user.	11	19
Guilt	Negative feedback from a participant describing any guilt felt by the participant as a result of tracker usage.	5	8
Harassment	Negative feedback from a participant describing instances they felt harassed by a tracker and its notifications.	7	12
Physical Form	Negative feedback from a participant describing the physical form of a tracker.	2	2
Presentation	Negative feedback from a participant describing the presentation of a tracker. This could be the basic user interface, or the detailed presentation of recorded data, or the lack of presentation of something the participants desired to see.	5	7
Reading Frequency	Negative feedback from a participant describing dissatisfaction regarding the frequency a tracker takes readings. For example, a participant with POTS may require more frequent heart rate readings.	3	7
Skin Reactions	Negative feedback from a participant describing reactions of the skin to the physical presence of a tracker, such as a watch strap.	4	6
Sleep	Negative feedback from a participant describing the sleep tracking features of a tracker.	1	1

Name	Description	Files	References
Steps	Negative feedback from a participant describing the step counting and/or tracking features of a tracker.	5	14
Symptom Record	Negative feedback from a participant describing symptom recording features of a tracker, whether those features are automatically done by the tracker or are manually entered by the user.	1	1
Workout Monitoring	Negative feedback from a participant describing the workout monitoring features of a tracker. This can include the notifications given to the user when the tracker believes a workout is occurring, or notifications about workouts given to the user outside of these times (that isn't more suitably coded as "Harassment" or "Guilt" instead).	1	2
Design Suggestions	Feedback from a participant suggesting some change in trackers. This is not restricted to just the tracker(s) the participant currently uses.	0	0
Include	A suggestion from a participant to include some features or form factor.	0	0
Form	A suggestion from a participant regarding the physical form of a tracker.	6	7
Ankle-Leg	A suggestion from a participant of a preference for the physical form of a tracker located in the ankle or leg region.	1	1
Arm	A suggestion from a participant of a preference for the physical form of a tracker located in the arm region.	2	2
Implant	A suggestion from a participant of a preference for the physical form of a tracker as an implant.	2	5

Name	Description	Files	References
Necklace	A suggestion from a participant of a preference for the physical form of a tracker as a necklace.	1	2
Ring	A suggestion from a participant of a preference for the physical form of a tracker as a ring.	2	2
Wrist	A suggestion from a participant of a preference for the physical form of a tracker located in the wrist region.	8	8
Function	A suggestion from a participant regarding the function of a tracker.	1	1
Alerts	A suggestion from a participant regarding a trackers ability to use alerting features.	6	10
App to Device Connection	A suggestion from a participant regarding a tracker comprising of a device connecting to a mobile application.	4	4
Blood Pressure	A suggestion from a participant regarding a trackers ability to record blood pressure.	5	5
Customisation	A suggestion from a participant regarding a trackers ability to have it's features, function, form, or some other aspect, customised.	10	16
Focused Purpose	A suggestion from a participant regarding a tracker possessing a focused design intent.	2	2
Other Sensors	A suggestion from a participant regarding a trackers possession of a sensor not described in other codes.	5	5

Name	Description	Files	References
Respiration	A suggestion from a participant regarding a trackers ability to track respiration metrics.	3	3
Symptom Tracking	A suggestion from a participant regarding a trackers ability to track symptoms of the user, whether automatically or by manual entry from the user.	5	8
Sync To Other Devices	A suggestion from a participant regarding a trackers ability to connect to and synchronise with other tracking or medical devices, such as insulin pumps.	4	5
Tailored Insight	A suggestion from a participant regarding a trackers ability to offer insight tailored to the user.	8	15
Presentation	A suggestion from a participant regarding the physical form of a tracker or its data and features.	0	0
Hardware	A suggestion by a participant regarding changing the hardware makeup of a tracker.	5	7
Software	A suggestion by a participant regarding changing the software makeup of a tracker.	14	21
Remove	A suggestion from a participant to remove some features of a tracker.	0	0
Connectivity	A suggestion from a participant to remove a trackers ability to connect to other devices, applications, or accounts. For example, the ability for a smart watch to connect to social media or music players.	2	2

Name	Description	Files	References
Mobile Apps	A suggestion from a participant to remove a trackers ability to connect to applications on a mobile phone.	1	1
Monetisation	A suggestion from a participant to remove a trackers monetisation, such as a subscription requirement for the full suite of features.	1	1
Device Adoption	A description or reference by a participant to the adoption of a tracker. This could include why the tracker was adopted, when, or how it was adopted.	13	17
Device Positive	Positive feedback regarding some aspect of a tracker as described by a participant.	1	1
Affordability	Positive feedback from a participant describing the affordability of a tracker. This could be regarding a subscription, the initial cost of purchase, or the cost of repair.	2	2
Alerts	Positive feedback from a participant describing the trackers ability alert the user to some change in recorded metrics.	7	10
Convenience	Positive feedback from a participant describing the convenience of a trackers, whether that's convenience of use or convenience of form.	9	14
Customisation	Positive feedback from a participant describing the customisation features of a tracker.	2	4
Energy Levels	Positive feedback from a participant describing the ability for a tracker to record, derive, or present energy levels to the user.	9	17

Name	Description	Files	References
Form	Positive feedback from a participant describing the physical form of the tracker.	2	3
Heart Rate	Positive feedback from a participant describing the ability for the tracker to record heart rate or associated measurements (such as HRV).	14	48
Pacing	Positive feedback from a participant describing the ability for the participant to pace as a result of using the tracker.	15	45
Respiration	Positive feedback from a participant describing the ability for a tracker to record respiration.	1	1
Sleep	Positive feedback from a participant describing the sleep tracking features of a tracker.	9	12
Smartphone Linking	Positive feedback from a participant describing the ability for a tracker to link with a smartphone.	3	3
Steps	Positive feedback from a participant describing the step counting or step tracking features of a tracker.	7	24
Workout Monitoring	Positive feedback from a participant describing the workout monitoring features of a tracker. This can include the notifications given to the user when the tracker believes a workout is occurring, or notifications about workouts given to the user outside of these times (that isn't more suitably coded as "Alerts", "Pacing", or some other code instead).	10	23
Device Types	Classification of the types of tracker a participant describes using.	1	3

Name	Description	Files	References
Application	Classification of a tracker that a participant discusses as an application.	12	27
Chest Device	Classification of a tracker that a participant discusses as a chest device, such as a heart rate monitoring strap.	1	1
Cycling App	Classification of a tracker that a participant discusses as a cycling application, eg. Zwift.	1	2
Gamified Devices	Classification of a tracker that a participant discusses as a gamified tracker.	2	3
Swimming Device	Classification of a tracker that a participant discusses as a swimming tracker.	1	1
Wrist Device	Classification of a tracker that a participant discusses as a wrist tracker.	15	22
Usage	Descriptions from a participant regarding when and how they use the tracker.	0	0
Live Monitoring	Description from a participant of using a tracker to monitor measurements live.	13	25
Proof of Symptoms	Description from a participant of using a tracker to confirm the presence and/or effect of symptoms.	12	38
Reflective Monitoring	Description from a participant of using a tracker to monitor measurements after they happen, in a reflective manner. For example, looking back on the days measurements in the evening.	17	67

Name	Description	Files	References
Positive Activities	Descriptions of activities that a participant describes as positive. This could be something the participant can still partake in despite their condition, or something the participants partakes in to ease symptoms.	0	0
Exercise	Descriptions of activities that a participant describes as positive, such as yoga.	3	4
Recreation	Descriptions of activities that a participant describes as positive, including hobbies.	2	3
Social	Descriptions of activities that a participant describes as positive with a social purpose.	0	0
Work and Housework	Descriptions of activities that a participant describes as positive involving some form of employed work or work to maintain a participants surroundings, such as cleaning.	0	0
Prevented Activities	An activity the participants describes as being prevented from participation due to their conditions and/or symptoms.	0	0
Everything	A description of general interference or non-function from the participant.	11	14
Hobbies	A described instance of the participant being prevented from taking part in hobbies.	0	0
Exercise	A described instance of the participant being prevented from taking part in a form of exercise. For example, going to the gym to workout.	7	15

Name	Description	Files	References
Recreation	A described instance of the participant being prevented from taking part in a form of recreation. For example, walks along the beach.	3	9
Sport	A described instance of the participant being prevented from taking part in sport.	3	5
Housework	A described instance of the participant being prevented from being able to complete tasks to maintain the standard of their home.	7	10
Social	A described instance of the participant being prevented from taking part in social activities, such as meeting friends.	10	15
Travel	A described instance of the participant being prevented from taking travelling to a location outside of their home.	6	12
Work	A described instance of the participant being prevented from completing employed work.	5	6
Symptoms	A description or reference to a symptom of the participant.	0	0
Cognitive	A description or reference to a cognitive symptom of the participant.	1	1
Brain Fog	A description or reference to brain fog by the participant.	19	41
Memory Problems	A description or reference to memory loss by the participant.	12	18
Proprioception	A description or reference to proprioception (the ability of a person to be aware of where their body is in the surrounding space) by the participant.	2	2

Name	Description	Files	References
Speech	A description or reference to a participants speech being affected by a symptom.	6	10
General Fatigue	A description or reference to the symptom of general fatigue, both mental and physical, by the participant.	16	28
Physical	A description or reference to a physical symptom of the participant.	2	3
Bowel-Bladder Movements	A description or reference to bowel or bladder movement problems by the participant.	2	2
Dizziness	A description or reference to dizziness by the participant.	7	9
Fatigue	A description or reference to physical fatigue by the participant.	8	15
Headache-Migraine	A description or reference to headaches or migraines by the participant.	1	1
Hearing Problems	A description or reference to hearing loss or interference by the participant.	2	2
Heart Rate-Blood Pressure	A description or reference to abnormal heart rate or blood pressure by the participant.	8	12
Muscle Problems	A description or reference to muscular problems, such as spasms or stiffness, by the participant.	9	10
Nausea	A description or reference to nausea by the participant.	2	3

Name	Description	Files	References
Nerve Issues	A description or reference to nerve issues, such as a loss of feeling, or an extreme amount of a feeling, by the participant.	5	8
Pain	A description or reference to experiencing physical pain by the participant.	17	40
PEM	A description or reference to post-exertional malaise or some similar symptoms by the participant.	14	24
Respiration	A description or reference to problems with respirations by the participant.	5	6
Sleep Problems	A description or reference to a lack of or an inconsistency in sleeping by the participant.	18	32
Struggle to Stand or Walk etc	A description or reference to struggling to stand, walk, sit, or similar, by the participant.	16	21
Vision Problems	A description or reference to a lack of or interference of vision by the participant.	4	4
